### VINEYARD INFORMATION

Valdobbiadene

### VINIFICATION

Whole grapes are put into the pneumatic press for soft pressing and the resulting must, after a first racking, is put into controlled temperature tanks where it remains until it is used for the production of sparkling wine

The must with added yeast cultures selected by La Gioiosa is then put into vessels where fermentation takes place at a controlled temperature of 15-16°C to enhance all the harvest fragrances. Upon reaching the required alcohol and sugar content fermentation is stopped by refrigeration. After a short settling period the sparkling wine is ready for bottling
